Woven Fabrics:

Used for separation, stabilization and reinforcement applications. Excellent separator for aggregate and sub-grade. Ideal for use under driveways, parking, storage, staging areas, roadways, airport runways, paving blocks and access roads. Also used as a soil reinforcement in retaining walls and steepened slopes, in foundation stabilization and as landfill covers.

Non-Woven Fabrics:

Used for drainage, filtration, erosion control and separation applications. Lightweight fabrics typically used in under drain systems to prevent soils from entering drainage systems.

Also Available

Geogrids, Woven and Monofilament Fabrics
